

AI visibility audit decision presentation

Client - Netherlands market - measured in Dutch

Sanitized from a real production audit. Identifying business information and competitor names were removed; retained numeric engineering metrics are unchanged unless explicitly noted.

Source run: 26 June 2026

Complete four-provider run

27 queries	4 models	108/108 valid responses
----------------------	--------------------	-----------------------------------

Execution

strict_production mode across OpenAI, Google, Anthropic and Perplexity. Success rate: 100%.

The measured language was Dutch. The product supports client output in ru, en, fi, de, nl and fr.

Measured visibility snapshot

37.0% visibility	37.0% recommendation	29.6% link rate
----------------------------	--------------------------------	---------------------------

Intervals stored in the source package

Visibility: 22.2%-55.6% Recommendation: 22.2%-55.6% Links: 14.8%-44.4%.

These are audit-time model observations, not forecasts of customers, revenue or future rankings.

Where visibility differed

Query type	n	Visibility	Recommendation	Links
Urgent	16	0.0%	0.0%	0.0%
Local	16	6.2%	6.7%	6.2%
Problem Based	16	0.0%	0.0%	0.0%
Category	16	12.5%	6.2%	6.2%
Comparison	12	16.7%	16.7%	16.7%
Industry Specific	16	31.2%	35.7%	18.8%
Service	16	25.0%	26.7%	6.2%

n counts model responses within each query type. Numeric values are unchanged from the source run.
